Just like the Tarot, there are numerous ways to arrange the Crop Circle Oracle Cards as a divination that allows one to glean guidance from Source. In the beginning it would be wise to simply meditate on one card a day, both on the Crop Circle itself & on what you find written on the text side of the card. Then, once you have gained some familiarity with the language of Sacred Geometry, you might enjoy divining with a partner so that each one of you can choose a card & intuit deeper levels of meaning for each other.

The reading format that offers clear yet in-depth guidance is based on a Medicine Wheel with 5 cards.

These can be drawn from the deck or chosen intuitively by attuning to a number between 1 & 78. The 5 card layout goes as follows:

The East card speaks of that which is being birthed within you at the present time.

The West card hints at an imminent rite of passage, what you need to surrender to move to the next level on your journey.

This is your death & rebirth card. The North card represents an energy emanating from your higher mind, your inner wisdom, what can be called your "adult Spirit Shield".

This one offers hints towards Alchemical Transformation.

The South card represents your Inner Child & Heart Space, where you will find Joy & Personal Creativity.

The 5th card is the Central Card of this reading. It represents your place of Integration, your Inner Guide or Mastery, how to channel 5th (or higher) dimensional energy into your life...

Once you have worked with this reading format for a few months, you may wish to try out an 11 card Tree-of-Life reading. More on that one later!!!

May these Crop Circle Oracle Cards bring you Pure Illumination...  
 And be sure to make use of the ReSource books & websites  
 that you find at the bottom of the cards.....
